

ANMO - CHINESE MASSAGE

The Anmo - Chinese Remedial Massage program is specifically designed for those who wish to change career paths, or for anyone (as long as they can speak, read and write in English to a good standard) wishing to study & practice in Chinese/Oriental Medicine.

The program will progressively take you through to being a professional massage therapist with plenty of scope for furthering your education as you gain more experience.

Most Academy programs are held at weekends where-ever possible, to enable those in full time employment the chance to train for a new life as a therapist.

All Academy programs are approved by the Institute for Complementary & Natural Medicine.
